

# **Cancer waits- Delivering the NHS Mandate**

**Dr Helen Thomas  
Clinical Director for Cancer  
Southwest Strategic  
Clinical Network**

14 November 2014

# Be Clear On Cancer

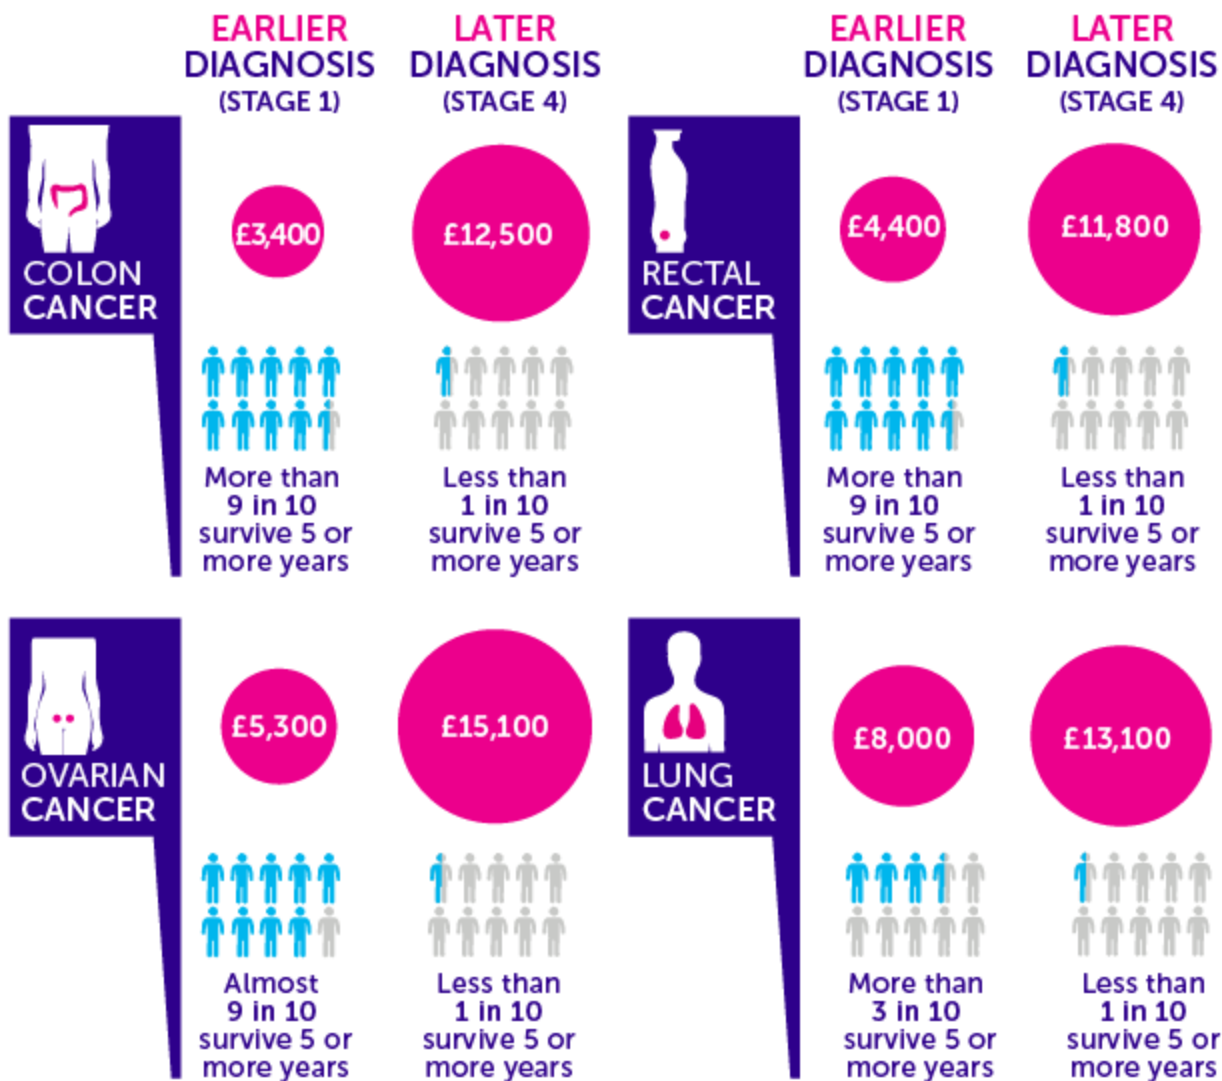

- Blood in pee- 22% increase in number of urological cancers diagnosed
- Skin- local campaign 21 June for 6 weeks- local providers noted a significant increase in urgent referrals and also an increase in malignant melanoma
- Cough for more than 3 weeks – 9% increase in diagnosis. One year survival from 35% to 39%

# National Awareness Early Diagnosis Initiative

- Urgent GP referral – need better criteria for 2 ww form to increase conversion rate
- Financial case for early diagnosis- new report from CRUK looking specifically at colorectal , lung and ovarian cancer

# Preventing Cancer

WHEN THE NHS DIAGNOSES PATIENTS EARLIER,  
TREATMENT COSTS MUCH LESS

# Clinical Decision Support tool

- MacMillan developed tool to use IT
- Works in three ways
- Opportunistic pick up
- Qrisk in screen
- Proactive identification of at risk patients from practice population

# Emergency Diagnosis of Cancer Audit

- Diagnostics
- Advice and Guidance
- Acute Oncology- communication , end of life

# Patient satisfaction
