This event is organised by Dr David Llewellyn and Dr Elzbieta Kuzma and in partnership with the Exeter Collaboration for Academic Primary Care (APEX). The workshop will provide clinicians with a practical evidence-based introduction to the identification of dementia in primary care.

The day will combine real-life scenarios, practical sessions and lectures.

CPD points applied for through the Royal College of Physicians.

TOPICS

- Understanding dementia
- Who is likely to have dementia?
- How to assess cognition?
- What should you do next?

COST

- General practitioners £220
- Trainee doctors £165
- Nurses and other health professionals working in primary care £128

10% early bird discount if delegates book before the end of May 2015
