

National Headliners

NHS "Rightcare" publishes four long term conditions case scenarios to compare variations between standard and optimal pathways: each of the four case conditions are examined through their care pathway, comparing a sub-optimal but typical scenario to an optimal pathway. At each stage it has been modelled against the costs of care, both financially to the commissioner and personally and emotionally to person and her family. The four scenarios are on:

- Multi-morbidity
- Colorectal cancer
- Progressive chronic kidney disease
- Parkinson's disease

e-Learning for Health (e-LFH): guidance on access for Care homes and Hospice staff: e-LFH's programmes cover subjects from communicating with empathy to dementia, end of life care to safeguarding adults. These are free online training sessions to enhance traditional learning, support existing teaching methods and provide a valuable reference point. There are two parts to the registration process:

1. Obtaining a registration code for the care home/hospice
2. Registration by members of staff who wish to use the e-LFH resources

End of Life Bulletin February 2018

What can we learn from the Vanguard's?: This briefing looks at what the vanguards set out to achieve when it comes to involving and engaging staff in the new care models. It shares the lessons and work that organisations and partnerships can take from the vanguards' experiences such as:

- Breaking down barriers across whole systems
- Engaging staff and communicating change
- Upskilling and supporting staff to work differently
- Inspiring staff through effective leadership

Regional Updates

New Electronic Palliative Care Co-ordination (EPaCCS) system: BNSSG CCGs are making progress implementing Stage one of the EPaCCS project. End of Life (EoL) information is recorded via an EMIS EoL template in the patient's GP Practice. This template is based on extensive local clinical consultation and the National Information Standard.

The GP EoL record will be shared across the health community via the Connecting Care portal from 22nd February. All services should look in Connecting Care for EoL information not the Adastra EoL Register and staff should have a Connecting Care licence to access EoL accurate patient information.

Please email scwcsu.bnssg.epaccs@nhs.net for more information
